Minimally Invasive Urologic Surgery Fellowship Program
Northern Ontario School of Medicine

A one-year postgraduate fellowship program providing specialized training in minimally invasive urologic surgery. Eligible applicants must have completed a urology residency. The program offers hands-on clinical experience with advanced endoscopic surgery for benign prostatic hyperplasia (Holmium Laser Enucleation of the Prostate, Thulium Fiber Laser Enucleation of the Prostate, GreenLight and Holmium Xpeeda Laser Vaporization of the Prostate, and Rezūm Water Vapor Therapy) and stone disease (Standard and Mini-Percutaneous Renal Access, Ureteroscopy).

This program integrates clinical and research work in stone disease and benign prostatic hyperplasia (BPH). It also includes education on the work-up and medical management of BPH and stone disease. Our research program strongly encourages innovative questions and ideas.

There is an expectation to produce 2 clinical manuscripts during the fellowship year.
The fellowship program is typically 12 consecutive months with the option of two start dates:

- January 1st to December 31st
- July 1st to June 30th

The fellowship may be extended for up to one additional year at the discretion of the division, department, and institutions.

Procedures	Volume
Holmium Laser (HoLEP) and Thulium Fiber Laser Enucleation of the Prostate (ThuFLEP)	60 cases
Minimally invasive treatment of the prostate (GreenLight PVP, Holmium Xpeeda Vaporization, Rezūm Water Vapor Therapy)	40 cases
Percutaneous Renal Procedures (Standard and Mini-PCNL)	50 cases
Ureteroscopy	150 cases
