

Howard B. Goldman

Dr. Goldman is a professor and vice-Chairman of the Glickman Urologic Institute on the faculty of the Cleveland Clinic Lerner College of Medicine. He has a joint appointment in the Departments of Urology and Obstetrics and Gynecology and is actively involved in the training of fellows and residents, including serving as the fellowship director for female pelvic medicine and reconstructive surgery. He has directly trained over 35 fellows and residents who are specialized FPMRS practitioners.

Dr. Goldman's interests are in the medical and surgical treatment of urinary incontinence and other types of voiding dysfunction, neuromodulation, prolapse repair, complex reconstructive female urologic surgery, robotic surgery, and neurourology. His contributions to the literature have been prolific: he is author of over 250 articles and book chapters, editor of three textbooks, and panel member for several standardization, guidelines, and best practice statement panels.

Dr. Goldman has been involved in and led numerous projects related to innovative treatments using stem cells for stress urinary incontinence, neuromodulation, use of urodynamics, management of complications, robotic surgery, and improvements in safety and efficiency in pelvic floor surgery.
